Summer 2021 Sick Camper Policy

**Daily Health Check.** Each camper will undergo a health screening prior to the start of camp each day (including missed camp days, see below). Prior to arriving at camp each day, each camper must receive a temperature check, and a parent or guardian must verify that the check was completed. In addition, a parent or guardian must complete a daily health screening questionnaire on behalf of their camper. If any of the below circumstances is true for a camper, that camper must stay home from camp:

- In the past 48 hours, the camper has reported:
  - A fever of 100.4°F or higher
  - A cough
  - Shortness of breath or difficulty breathing
  - A sore throat
  - Headache
  - New loss of taste or smell
  - Muscle or body aches
  - Nausea/vomiting/diarrhea
  - Congestion or running nose not related to seasonal allergies
  - Unusual fatigue
- Someone living in the household with the camper has reported any of the above symptoms
- Within the past 14 days, the camper has been in close contact with someone with suspected or confirmed COVID-19
- Within the past 10 days, the camper has had a positive test result for COVID-19
- The camper is currently awaiting the results of a COVID-19 test
- Within the past 14 days, the camper has been instructed by a public health or medical professional to self-monitor, isolate or quarantine because of concerns of COVID-19 infection
- The camper has taken medication to reduce a fever prior to coming to camp

If a camper is out sick and did not report on the daily health check, they must also complete a health check for the missing days.

**Illness during Camp.** If a camper presents a fever or reports feeling ill during camp, and the determination of staff is to isolate the camper on-site, a parent or legally authorized adult will be called to pick them up immediately. In the case where a camper who has attended camp develops symptoms of COVID-19, we will notify all parents with children in that camp without releasing any information about the camper’s identity.

**Returning to Camp after Illness.** Should a camper be sent home from camp due to illness with any type of symptoms, our policy is:

If the symptoms are not suspected of being COVID-19, the camper can return to camp after they have been symptom-free for 24 hours.

Any camper with symptoms of suspected or confirmed COVID-19 can return to camp when:

- At least 24 hours have passed since recovery (defined as no fever without the use of medications and improvement in respiratory symptoms like cough and shortness of breath); AND
- At least 10 days have passed since the symptoms first appeared
If a camper believes they have had close physical contact with someone with COVID-19 but they are not showing signs of illness, their health should be closely monitored for development of a fever, cough, shortness of breath and other COVID-19 symptoms for at least 14 days following the last day they were in contact with the person infected with COVID-19. The camper should not attend camp or other public places for those 14 days. All illness or close physical contact with someone with COVID-19 will be reported to camp staff as soon as possible.

**Certification**

I am the parent or legal guardian with responsibility for the minor child named below. I am in receipt of the Summer 2021 Sick Camper Policy and I have read it in full, understand it completely, and agree to follow all provisions of this policy including health screenings and reporting of any illness or positive COVID-19 diagnosis.

Minor Name: ________________________________ Age: __________

Parent/Guardian Name: __________________________________________

Parent/Guardian Signature: __________________________ Date: __________
