Summer 2020 Sick Camper Policy

**Daily Health Check.** Each camper will undergo a health screening prior to the start of camp each day (including missed camp days, see below). Each camper must receive a temperature check at the beginning of each day of camp, and a parent or guardian must verify that the check was completed. Pacific Science Center will provide access to a third-party HIPAA-compliant phone app that will assist in the screening process and verification of the absence of symptoms of illness. If any of the below circumstances is true for a camper, that camper must stay home from camp:

- In the past 24 hours, the camper has reported:
  - A fever of 100.4°F or higher
  - A cough
  - Shortness of breath or difficulty breathing
  - A sore throat
  - Chills
  - New loss of taste or smell
  - Muscle or body aches
  - Nausea/vomiting/diarrhea
  - Congestion or running nose not related to seasonal allergies
  - Unusual fatigue

- Someone living the household with the camper has reported any of the above symptoms
- The camper has been in close contact with someone with suspected or confirmed COVID-19
- The camper has taken medication to reduce a fever prior to coming to camp

Additionally, camp staff will check the child for other signs of illness, including but not limited to flushed cheeks or tiredness.

If a camper is out sick and did not report on the daily health check, they must also complete a health check for the missing days.

**Illness During Camp.** If a camper presents a fever or reports feeling ill at any point during camp, and the determination of staff is to quarantine the camper on-site, a parent or legally authorized adult will be called to pick them up immediately. Any camper who presents a fever will not be allowed to return to camp that week at a minimum. In the case where a camper becomes ill or presents a fever during camp, we will notify all parents with children in that camp without releasing any information about the camper’s identity.

**Returning to Camp after Illness.** Should a camper be sent home from camp due to illness with any type of symptoms, our policy is:

If the symptoms are not suspected of being COVID-19, the family/guardian will be notified that the camper cannot return for 24 hours.

Any camper who had signs of suspected or confirmed COVID-19 per our Escalation process can return to camp when:

- They have a negative COVID-19 Test during the period after exposure: OR
- At least 3 days have passed since recovery (defined as no fever without the use of medications and improvement in respiratory signs like cough and shortness of breath); AND
• At least 10 days have passed since the signs first showed up

If a camper believes they have had close contact with someone with COVID-19 but they are not showing signs of illness, their health should be closely monitored for development of a fever, cough, shortness of breath and other COVID-19 symptoms for at least 14 days following the last day they were in contact with the sick person with COVID-19. The camper should not attend camp or other public places for those 14 days, unless they have tested negative during the period after exposure. All illness or suspected contact with someone with COVID-19 will be reported to camp staff as soon as possible.

Certification

I am the parent or legal guardian with responsibility for the minor child named below. I am in receipt of the Summer 2020 Sick Camper Policy and I have read it in full, understand it completely, and agree to follow all provisions of this policy including health screenings and reporting of any illness. I agree to use the health screening app made available by Pacific Science Center to complete a daily health screening of my camper.

Minor Name: __________________________________________ Age: ____________

Parent/Guardian Name: _________________________________________________________________

Parent/Guardian Signature: _______________________________ Date: ______________
