Welcome to Fever Free

We are very excited to partner with Pacific Science Center to make sure camp goes on and everyone stays healthy! Fever Free allows community members to submit remote health checks from home to ensure everyone is healthy before they interact.

All health checks are 100% private. Camp directors are only able to see whether families are clear to arrive or not. Other camp members cannot see the status of your health checks - only that they were completed to create community accountability!

How to get started:

1. You should have received an email invite from Fever Free with a link to get started. If you don’t see it, check your spam box and mark the email as “Not Spam” so you can receive important communications.
2. If you do not see the email, use this link: https://fever-free.app.link/start to sign up from your mobile phone.
3. Make sure to use the email address you used to signup for camp.
4. Install the Fever Free App and create your account.
5. If you have any problems, email support+fever-free@weecare.co

How to submit a health check:

1. Open the Fever Free app and tap “Submit Health Check” at the top of the screen.
2. Grant camera and microphone permissions to submit your private video.
3. Take a video of yourself taking your child’s temperature using a digital thermometer and clearly show the reading on the screen.
4. Press the stop recording button and confirm that you can clearly see the temperature reading. If so, press the green confirm button.
5. On the following screen, self report any symptoms.
6. You will receive a notification with your clearance status shortly after the video is processed

If you have multiple children:

1. After you have submitted your first child's health check, click the menu icon on the bottom right of the Fever Free app.
2. Click “Submit Health Check” to submit another screening.
3. Repeat process for any additional children.
