COVID Health Related Quick Sheet

Summer 2020

Pacific Science Center has taken steps to ensure the lowest risk of spread of COVID-19. Pacific Science Center is following the guidance of the Center for Disease Control and the Washington State Department of Health with the safest protocols for running camps.

This will include but not be limited to:

- Cleaning the facility using products that meet EPA disinfection criteria.
  - Deep cleaning overnight
  - Multiple daily cleanings throughout the day
- Performing a daily Well Check for all campers before arriving
  - Either using the FeverFree app*, or
  - Completely filling out the Health Status form
- Ensuring that campers and staff wear face masks
- We ask that parents teach and reinforce the use of cloth face coverings. Face coverings may be challenging for campers (especially younger campers) to wear in all-day settings such as camp. Face coverings should be worn by staff and campers (particularly older campers) as feasible, and are most essential in times when physical distancing is difficult. Information will be provided to staff and campers on proper use, removal, and washing of cloth face coverings.
  - Note: Cloth face coverings should not be placed on:
    - Anyone who has trouble breathing or is unconscious
    - Anyone who is incapacitated or otherwise unable to remove the cover without help
  - Note: Cloth face coverings are meant to protect other people in case the wearer is unknowingly infected but does not have symptoms. Cloth face coverings are not surgical masks, respirators, or other medical personal protective equipment.
- Providing adequate supplies so that campers do not have to share materials
- Keeping each camper’s belongings separated from others’ and in individually labeled containers, cubbies, or areas.
- Ensuring campers and staff are 6 feet apart.
- Supporting healthy hygiene including washing hands, using sanitizer and the wearing masks
  - PacSci will supply soap, hand sanitizer with at least 60% alcohol, paper towels, disinfecting wipes, face coverings, and no-touch trash cans.
- Not using drinking fountains or water refill fountains in order to minimize touch areas, especially those that are so closely associated with the face. Please have your camper bring sufficient water each day. We suggest 32 oz. of water, etc.
- Not allowing guardians into the buildings. When dropping off or picking up, guardians will stay 6 feet apart and wear a mask at all times.
- Following either different pathways for each camp or staggered use paths
  - Paths will be clearly marked
• Camps will not travel in hallways during the same time, Educators will ensure pathways are clear
• Designating separate time for each camp to use the bathroom facilities. We will limit the number of campers in each bathroom at one time, depending on the size of the bathroom and close alternating stalls to ensure distance is maintained. Bathrooms will be cleaned between camp uses.
• All of our HVAC systems are set to bring in 100% outside fresh air and all of our filters are replaced with the best possible filtration with zero recirculation. Where possible, we will leave all classrooms open to assist with ventilation and air circulation.

*Look for an invitation in the email inbox used to register you camper on the Friday before camp begins. Once you click on the link in the email, you will be taken to the Fever Free website or prompted to download the app or use a web browser on your phone depending on what device you are using (available for Android and iPhone). You will be prompted to take a video of your camper having their temperature taken before facing the thermometer read out towards the camera. You will then be prompted to report any current health symptoms before submitting your results.
