

FIELD TRIP EXPERIENCES

IMAX® DOCUMENTARIES

Pacific Science Center houses Seattle's biggest movie screen, in the Boeing IMAX® Theater. Our movies are brought to life by next generation IMAX Laser technology, putting you right in the action. Our PACCAR IMAX® Theater features IMAX digital projection that immerses you in the movies. Your students will be delighted by the ultimate educational IMAX experience!

Amazon Adventure 3D

Opens November 10, 2017

Amazon Adventure 3D tells the epic, true story of explorer Henry Bates' 11-year journey through the Amazon rainforest as a young man who risks his life for science in the 1850's. Audiences will experience the compelling clues Bates unearths in his discovery of mimicry, where certain animals adopt the look of others to help them deceive predators to survive. Bates made other crucial contributions to biology: identifying 8,000 new species and presenting the first case for the creation of a new species, which Charles Darwin called the "beautiful proof" for natural selection.

Born to be Wild 3D

Opens September 5, 2017

Born to be Wild 3D documents orphaned orangutans and elephants and the extraordinary people who rescue and raise them—saving endangered species one life at a time. This heartwarming adventure transports audiences into the lush rainforests of Borneo with world-renowned primatologist Dr. Birute Galdikas, and across the rugged Kenyan savannah with celebrated elephant authority Dame Daphne Sheldrick, as they and their team rescue, rehabilitate and return these incredible animals back to the wild.

Dream Big 3D: Engineering Wonders of the World

Playing September 2017

All around the world, engineers are pushing the limits of ingenuity and innovation in unexpected, imaginative and amazing ways. Created in partnership with American Society of Civil Engineers, *Dream Big 3D* takes viewers on a journey of discovery from the world's tallest building to a bridge higher than the clouds and a solar car race across Australia. Along the way the audience will witness how today's engineers are shaping the world of tomorrow.

Flight of the Butterflies 3D

Playing winter 2018

Flight of the Butterflies 3D is a scientific adventure story that spans not only thousands of miles, but generations. It's about the remarkable Monarch butterfly migration and the determined scientist who spent 40 years trying to discover exactly where the butterflies mysteriously disappeared when they flew south for winter.

Search for Life in Space 3D

Opens September 5, 2017

Journey from the depths of the Pacific Ocean into the far reaches of space on a quest to find something that changes everything—signs of life, somewhere else in the universe. With cutting-edge imagery from the world's most powerful telescopes, *The Search for Life in Space 3D* takes audiences from the surface of Mars and the icy moons of Jupiter and Saturn, to the extreme lava fields of Hawaii and thermal vents deep beneath the sea. In these harsh environments, astrobiologists look for clues to how life takes hold.
